

e-zone DUCTED AIR-CONDITIONING. WAY BEYOND COOL.

YOU'RE LOOKING AT THE ULTIMATE CHILL PILL.

e-zone's 7-inch colour touchscreen does double duty as a tablet. Now you can manage your comfort and your home from one central hub.

The e-zone screen is easy to read and simple to navigate. As the touchscreen is integrated with both the air management system and air-conditioning unit, you can control every function from the one screen. With a touch, you can see which rooms are receiving air and how much, open and close zones, set programs and turn the air-conditioner on or off.

You can control the rest of your home with the same ease by loading it up with your favourite Android apps. Pay bills, order groceries, search a recipe, play music, skype while you cook... As the touchscreen is wired to the wall, it never goes missing and never needs charging.

MORE CONTROL AND CONVENIENCE WITH THE e-zone APP.

The e-zone app turns all your other smart devices into additional remote controls. It works through your Wifi, and lets you access and control your air-conditioning both from within the home and anywhere in the world.

True comfort is being in total control.

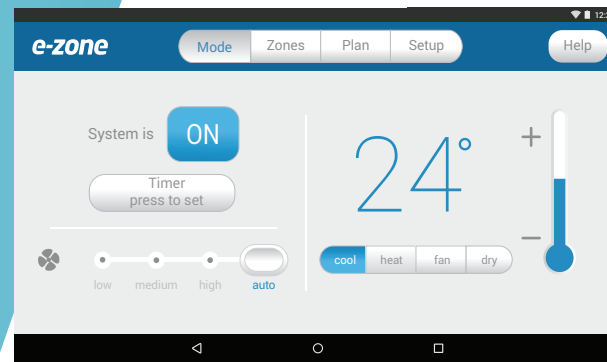

(Apple iOS9.0 or higher and Android V4.2 or higher)

A TOUCHSCREEN THAT'S ALSO A TABLET. COOL.

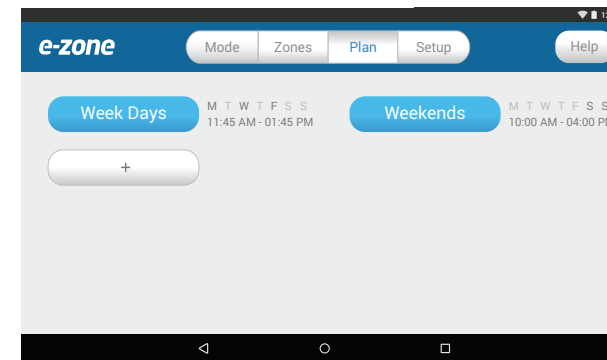

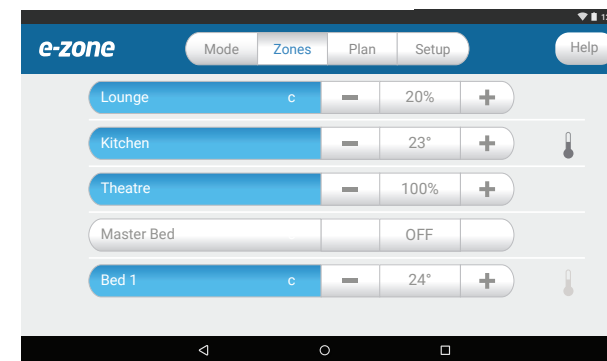

CONTROL IS INTUITIVE

The e-zone touchscreen controls both the air management system as well as the air-conditioning unit. If you know how to use a tablet or iPad, then you already know how to use it. Simply tap on the function you want and follow the prompts. We've designed the system to be as intuitive to use as possible and if you ever need it, there is always a HELP button available on each screen.

HOME SCREEN

On the left side of the screen, you can turn the system On or Off, select your Fan Speed, and set a Timer. On the right side of the screen you can change the mode and set your desired temperature by pressing the +/- buttons

ZONES

To control how much air goes where, press the ZONES button. The ZONES screen will display every room in your house. To open or close a zone, simply tap on the room name, or to adjust the airflow press the plus or minus button. If the room has a temperature sensor, the number displayed will be a temperature not an airflow percentage.

PLANS

Your e-zone system can be scheduled to turn on or off and run a pre-selected series of settings for your zones at your required time. Simply set the system the way you would like it to be, and go to the plans page and press the + button to create a new plan. Set the time you would like that plan to start and stop, and then select the days of the week that you would like it to run. You can do this for up to 10 different plans.

STANDARD SYSTEMS:

If all bedrooms are on one zone, all rooms must be air-conditioned, even when some are not in use.

E-ZONE:

When every room is zoned separately you only air-condition the rooms you are using.

ENGINEERED TO SAVE ENERGY WITH 10 ZONES.

Our obsession with comfort extends to your energy bills. e-zone is engineered for precision air management and maximum energy efficiency. As e-zone has up to 10 zones, each room can be controlled independently. You control precisely which rooms receive conditioned air so there's no paying to heat or cool empty rooms.

This is in sharp contrast to standard systems that have only 4 or 5 zones, and therefore have to clump several rooms in each zone. You may only be using 3 rooms, but due to restrictive zoning you'll pay to run the system in nearly the whole house.

Master Bed

75%

PRECISION AIRFLOW FOR PERFECT COMFORT.

You not only control which rooms receive air, you determine exactly how much. With e-zone you can adjust the airflow to any room from 5 to 100% output, in precise 5% increments. Everyone can customise the airflow to their room, to their personal preference.

THE OPTION OF INDIVIDUAL TEMPERATURE CONTROL.

If you'd prefer everything to be adjusted automatically, you have the option of upgrading to Individual Temperature Control (ITC). Each ITC sensor acts like a thermostat, instructing the system to continually adjust the airflow to maintain your selected temperature. They are particularly beneficial in west facing or upstairs rooms.

Alternatively you may use ITC in an east facing room to ensure rooms are not over air-conditioned for extra energy savings.

e-zone's Exact Air Regulator
was awarded an Australian
Design Mark award for innovation.

Standard Systems

- Conventional dampers and internal 'scoop'
- Imprecise

THE COMPONENTS OF PRECISION AIR MANAGEMENT.

Housed in the ducting, dampers control airflow. In standard systems, dampers look like a large metal tube with a circular internal scoop that pivots to increase or decrease airflow. As the scoop starts to close, it quickly meets a great deal of resistance making it impossible to precisely control airflow.

Our solution was to create our own, based on the design used in commercial high-rise buildings.

Instead of a pivoting scoop, e-zone's Exact Air Regulators incorporate Opposed Blade Dampers (OBDs). They work like double doors that can open and close in precise 5% increments. As the air goes exactly where it is directed, you achieve your preferred temperature as energy efficiently as possible.

A REPUTATION FOR INNOVATION.

e-zone is made in Australia by Advantage Air. We are an Australian company that has been designing, manufacturing and distributing innovative ducted air-conditioning systems from our head office in Perth, Western Australia, since 1990. We take pride in creating and exporting a local product that is world class.

Our systems are renowned for harnessing the latest technology to deliver unrivalled comfort and energy efficiency; first with Zone 6, then Zone10, Gen III, and now with e-zone.

We embrace innovation and invest heavily in research and development. Over the past 25 years, we have developed numerous industry firsts and earned a slew of patents, registered designs and design awards.

CONSUMER SUPPORT.

e-zone is designed to be robust and intuitive to use. However, should you ever require service or support, we have our own internal consumer support centre, staffed right here in Australia by our own staff. You can therefore be assured of the quality of service and advice you will receive.

Note: We endeavour to achieve compatibility with as many Wifi routers as possible, and while remote access works fine on most routers, there are some instances where compatibility is difficult and at times, impossible. Should you encounter difficulty with accessing your MyAir remotely, we are more than happy to assist as much as possible, but please also be aware that on some occasions the solution is to use a Wifi router known to be compatible with our products.

PEACE OF MIND WARRANTY.

Since 1990 Advantage Air components have become known for their quality, precision, strength and durability. To prove our confidence, we provide a:

- 10-year warranty on all ducting and mechanical components
- 5-year warranty on all electronic controls.

Activation Code - The e-zone system has an activation feature. A code may be required from your installer to activate your system within the first 21 and 42 days.

CORPORATE RESPONSIBILITY.

Advantage Air is all about bringing comfort to people. We are proud to be a sponsor of Channel 9's Matt & Kim to the rescue. The show delivers life-changing renovations to families in desperate need.

AIR-CONDITIONING CHECK LIST

BEFORE YOU DECIDE ON A SYSTEM, MAKE SURE YOU HAVE ASKED THESE QUESTIONS.

 The Air Management System	Other Systems	Advantage Air System
Does the ductwork meet all Australian Standards (AS1530 and AS4254)?		✓
Are the ductwork and fittings covered by a full 10-year warranty?		✓
Are the products Australian manufactured for Australian conditions?		✓
Is the controller intuitive to use, with on-board help and people you can talk to should you experience any difficulty?		✓
Does the constant only open when needed?		✓
Do the dampers have opposable blades for greater air delivery precision?		✓
Does the filter come with a 10-year warranty?		✓
Is the filter electrostatically charged to improve filtration?		✓
